Continued Examination after Final Rejection

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 14, 2007 has been entered.

EXAMINER'S AMENDMENT

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

3. The Amendment filed on May 14, 2007 has been amended as follows:

(a) in Claims 5-8, line 1, the term "(withdrawn without prejudice)" has been changed to --(cancelled without prejudice)--

4. Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas Wettermann on July 19, 2007.

Allowable Subject Matter

5. Claims 11 and 16 are allowable over prior art.

6. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on the amendment filed on May 14, 2007:

Regarding claim 11, the prior art of record considered as a whole fails to teach or fairly suggest an apparatus for the writing and reading of a holographic recording medium having the following features:

(a) movable or fixed read and write optics (9), the write optics comprising a polarised writing light source (20), the read optics comprising a polarised reading light source (21);

(b) the wavelength of the reading light source (21) is different from the writing light source (20), recording data in a multiple recording layer, of the thickness of 250- 1000 nm; and

(c) the writing source (20) is of the kind of polarization holography;-and the read optics comprise wavelength distortion correcting means for correcting the distortion of the reconstructed image caused by the difference in the wavelength of the reading and writing light wherein the wavelength distortion correcting means of the read optics comprise an aspherical plastic objective lens (48).

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Kim CHU whose telephone number is (571) 272-7585 between 9:30 am to 6:00 pm, Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrea Wellington, can be reached on (571) 272-4483.

The fax number for the organization where this application or proceeding is assigned is (571) 273-8300
